PROFESSIONAL SUMMARY

Results-oriented Software Engineer with 2+ years of professional experience specializing in modern frontend architecture and scalable web applications. Highly skilled in the React ecosystem (Next.js, React.js) and Vue.js, with a proven track record of optimizing application performance and managing complex state. Adept at handling large-scale data processing, secure authentication pipelines (JWT, NextAuth), and advanced API integrations (TanStack Query) to deliver seamless, high-performance user experiences.

TECHNICAL SKILLS

- Frontend Frameworks:** Next.js, React.js, Vue.js, JavaScript (ES6+), HTML5, SCSS
- Architecture & State:** Context API, React Hooks, Component-Driven Architecture, DOM Virtualization.
- Data Management:** TanStack Query (React Query), TanStack Virtual, REST API Integration, Data Streaming
- Backend & Cloud:** Node.js, Express.js, MongoDB, Firebase.
- Security & Tools:** NextAuth.js, JWT Authentication, Git and Middleware Implementation.

PROFESSIONAL EXPERIENCE

Software Engineer | Eloit Innovations Pvt. Ltd. (October 2024 – Present)

- Enterprise UI Architecture:** Spearheaded a Next.js ERP frontend, implementing advanced state management, dynamic routing, and JWT/NextAuth authentication.
- Performance & Data Processing:** Engineered batch processing (@react-pdf/renderer) for 200+ simultaneous PDFs and streamed 500+ record bulk Excel uploads, ensuring zero UI blocking.
- API & State Management:** Integrated REST APIs using TanStack Query for optimal caching and implemented DOM virtualization to smoothly render massive datasets.
- Dynamic UI Modules:** Developed a customizable report card module utilizing Vue.js, streamlining complex data entry and real-time validation.
- Frontend Architecture & UI Design:** Engineered responsive, high-fidelity client websites from scratch utilizing Next.js and modular SCSS, ensuring optimal cross-browser compatibility and user experience.
- Security & Access Control:** Engineered scalable Role-Based Access Control (RBAC) architectures on the frontend utilizing NextAuth, securely managing user permissions and dynamically rendering UI components based on authorization levels.

Full Stack Developer Intern | Mashupstack (December 2023 – September 2024)

- MERN Stack Development:** Built responsive React single-page applications (SPAs), engineering robust backend REST APIs via Express.js and Node.js.
- Cloud Integration:** Implemented Firebase Cloud Firestore for scalable database storage and configured secure user authentication.

EDUCATION

- Master of Computer Applications (MCA) | C.H.M.M College For Advanced Studies** (2021 – 2023)
- Bachelor of Computer Science (BSc) | C.H.M.M College For Advanced Studies** (2017 – 2020)

ADDITIONAL INFORMATION

- Certifications:**
 - HTML, CSS, and JavaScript for Web Developers** – Johns Hopkins University (Coursera).
 - Introduction to C Programming** – NPTEL (IIT-level certification).
 - MERN Stack Development** – Mashupstack.
- Soft Skills:** Technical Debugging, RESTful API Design, Team Collaboration, Problem Solving.
- Languages:** English, Malayalam.
